

3. Dar de alta un teléfono.

Una vez que la centralita ha arrancado, volvemos a abrir Cisco Configuration Assistant.

Nos conectamos al site previamente creado:

Una vez logeados en Cisco Configuration Assistant, navegamos en el menú del panel izquierdo: Configure \rightarrow Telephony \rightarrow System \rightarrow Region:

Tenemos que rellenar 2 campos:

- Number of Digits Per Extension: es el número de dígitos que le queremos asignar a las extensiónes.
- Voicemail Access Extension: Extensión de acceso al buzón de voz.

Pulsamos Ok y se actualizará la centralita:

Pinchamos en la línea que está en verde y rellenamos los campos que nos muestra a la derecha:

- First name: nombre de la persona que va a usar el teléfono.
- Last name: apellido nombre de la persona que va a usar el teléfono.
- User ID: un id del usuario, en principio no se va a usar pero es un campo obligatorio,
- Extension: Extensión que le queremos asignar al teléfono.
- **Button label**: Nombre que le queremos dar a esa extensión para que lo muestre en pantalla.
- **Description**: una descripción para que tengamos el teléfono identificado.
- **Permissions**: restricciones. Su función es restringir llamadas salientes: locales, nacionales, internacionales, etc...
- **Call Forward Busy**: es un desvío para que cuando el teléfono llamado esté ocupado. Si está ocupado salta a la extensión que indiquemos.
- Call Forward No Answer: Se desvía la llamada solo si no hay respuesta.
- CFNA Timeout (seconds): definimos el tiempo que tiene que pasar para que se activen los desvíos de arriba.

El modelo 525G Cisco IP Phone, tiene una botonera en la parte derecha de la pantalla. Se lo puede asignar una línea a cada botón de la misma manera:

Una vez configurados todos, nos muestra una lista con los datos de cada uno:
